

# OnGuard!™

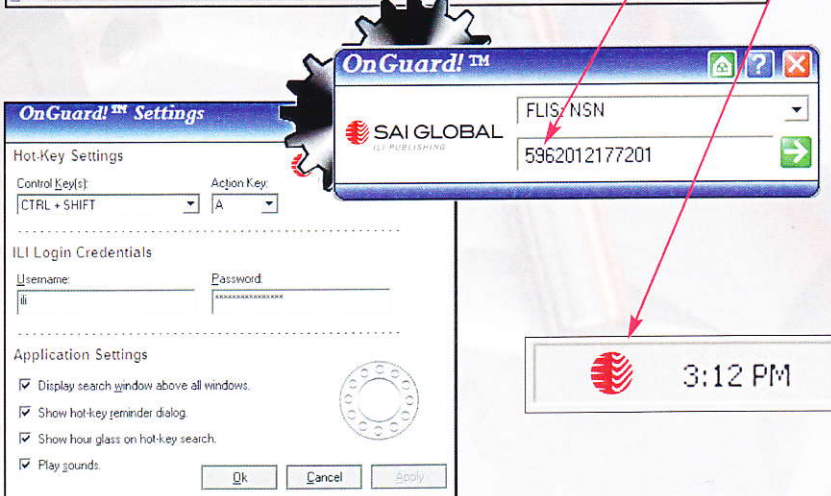

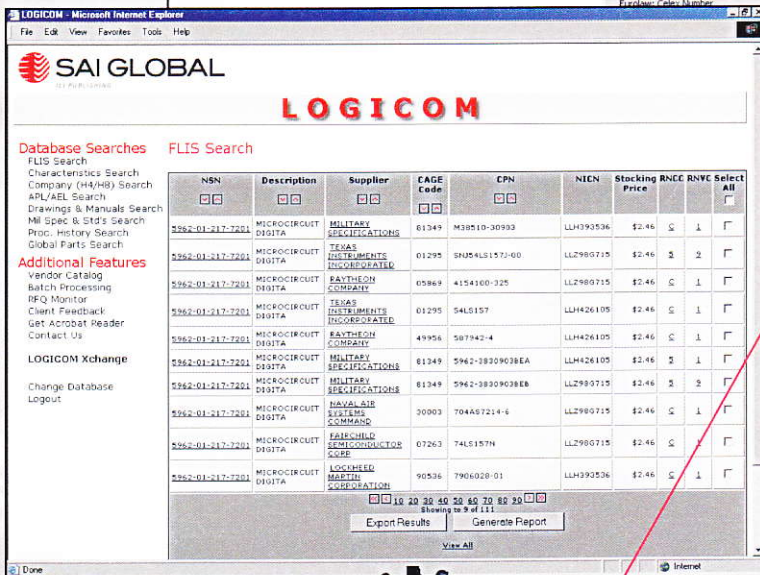

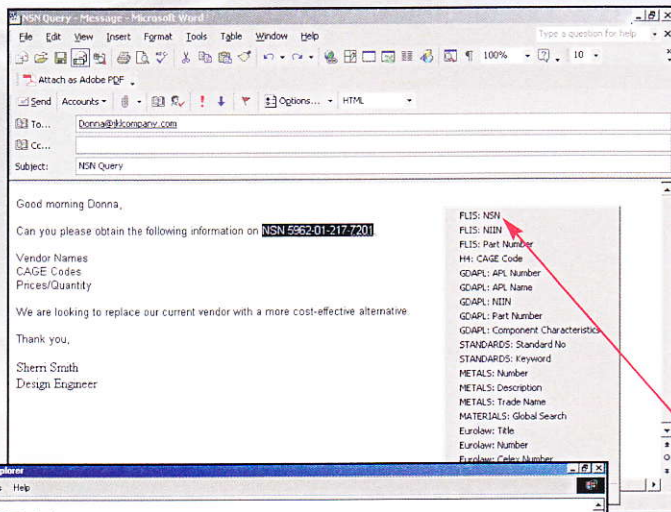

OnGuard!™ is a time-saving application which allows instant searching of any SAI Global database for mission-critical data, such as numbers or keywords from any program.

Just highlight the number or word wherever you find it—on the web, in a document or spreadsheet. Hit a pre-defined Hot-Key or use the OnGuard!™ search box and you will automatically log-in to your SAI Global databases and see the results of your search in seconds.

As a simple downloadable file, OnGuard!™ sits as an active icon on your computer's task bar, always ready to search instantly.

Save time and money in the workplace: Use OnGuard!™ as your instant connection to mission-critical data.

For more information or a free demonstration, contact your SAI Global representative at [sales@ili-info.com](mailto:sales@ili-info.com).
