

STANDARDS INFOBASE

 SAI GLOBAL

The most comprehensive standards information,
acquisition and management power house

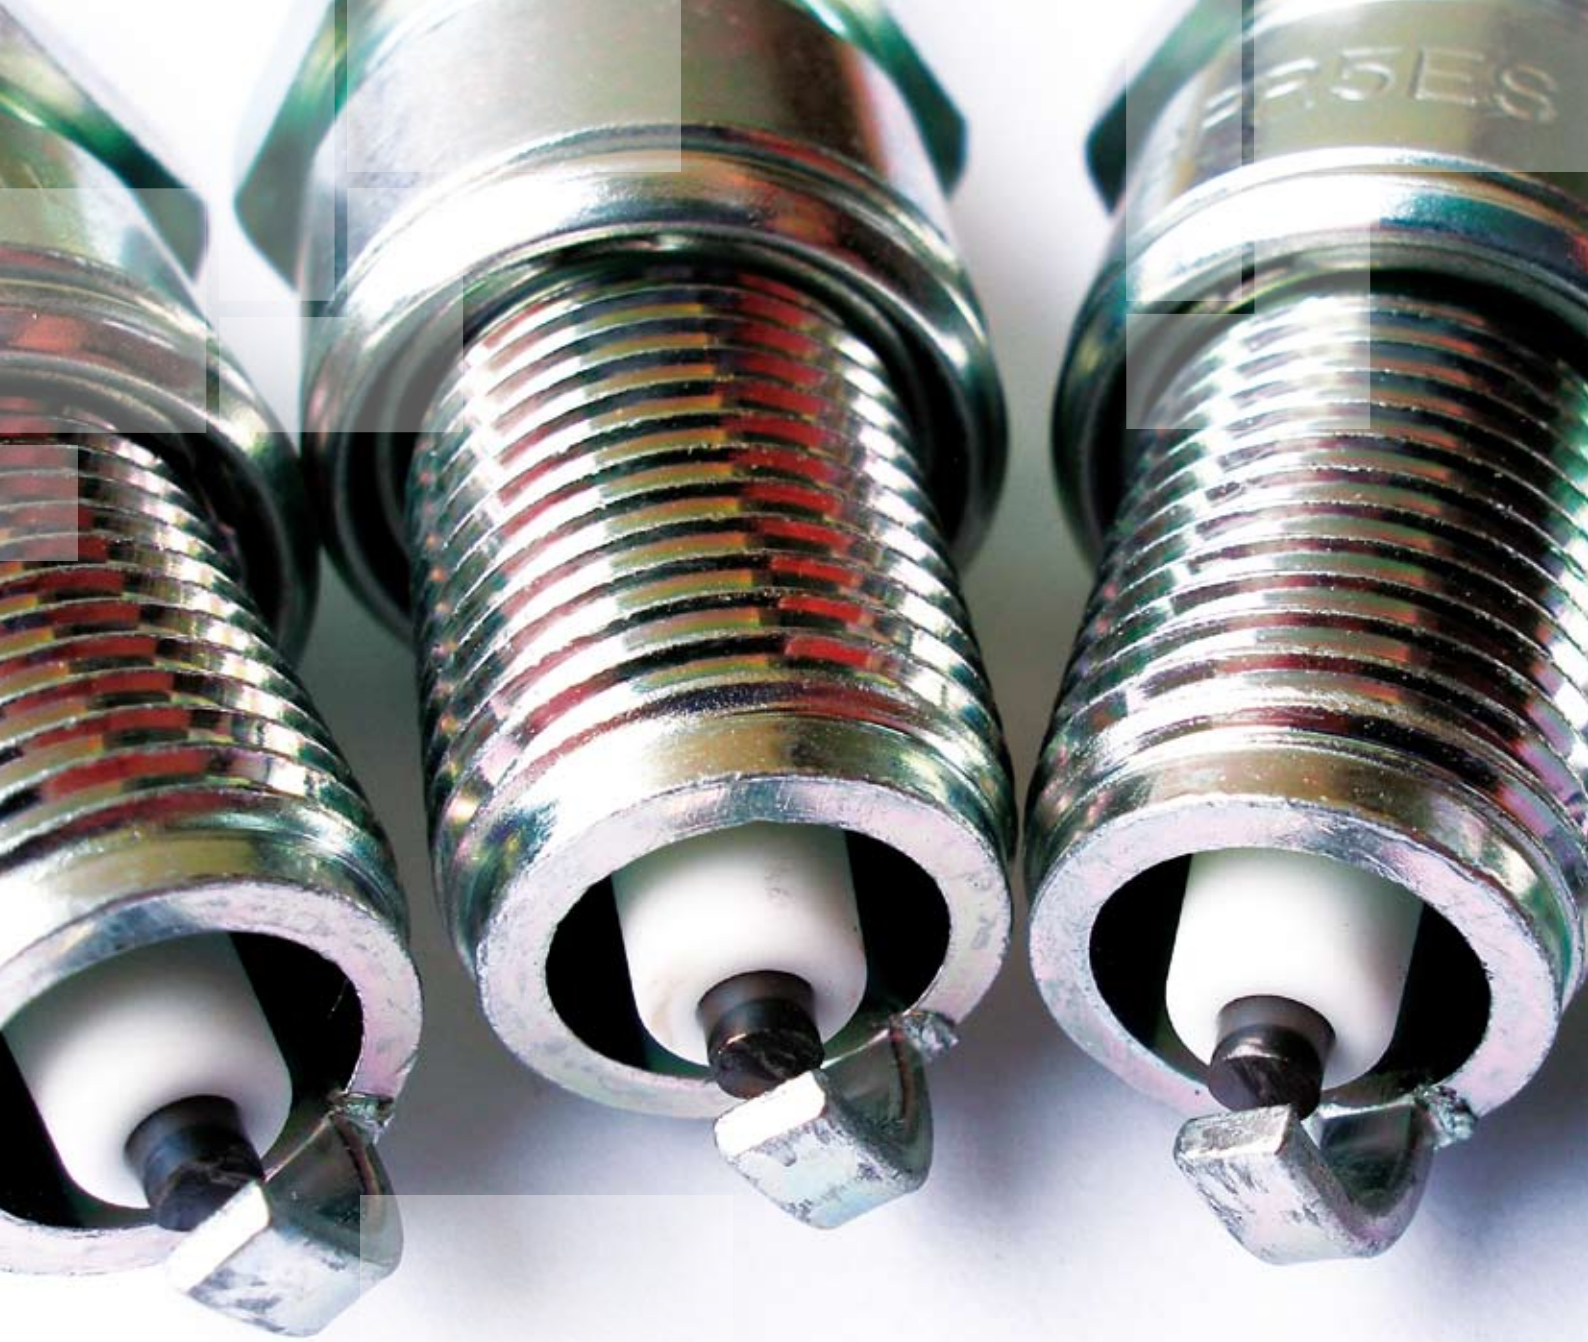

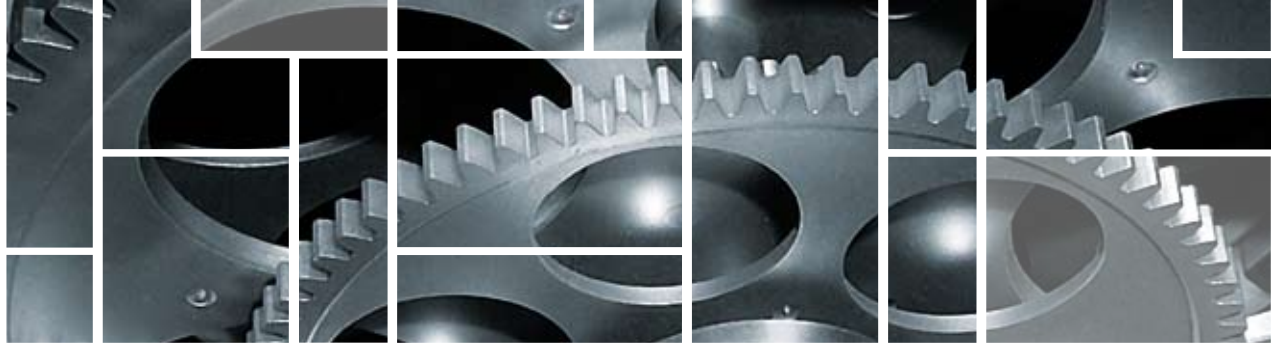

**COMPANIES ALL
AROUND THE WORLD
HAVE DISCOVERED
HOW SAI GLOBAL'S
STANDARDS INFOBASE
CAN HELP POWER
THEIR BUSINESS**

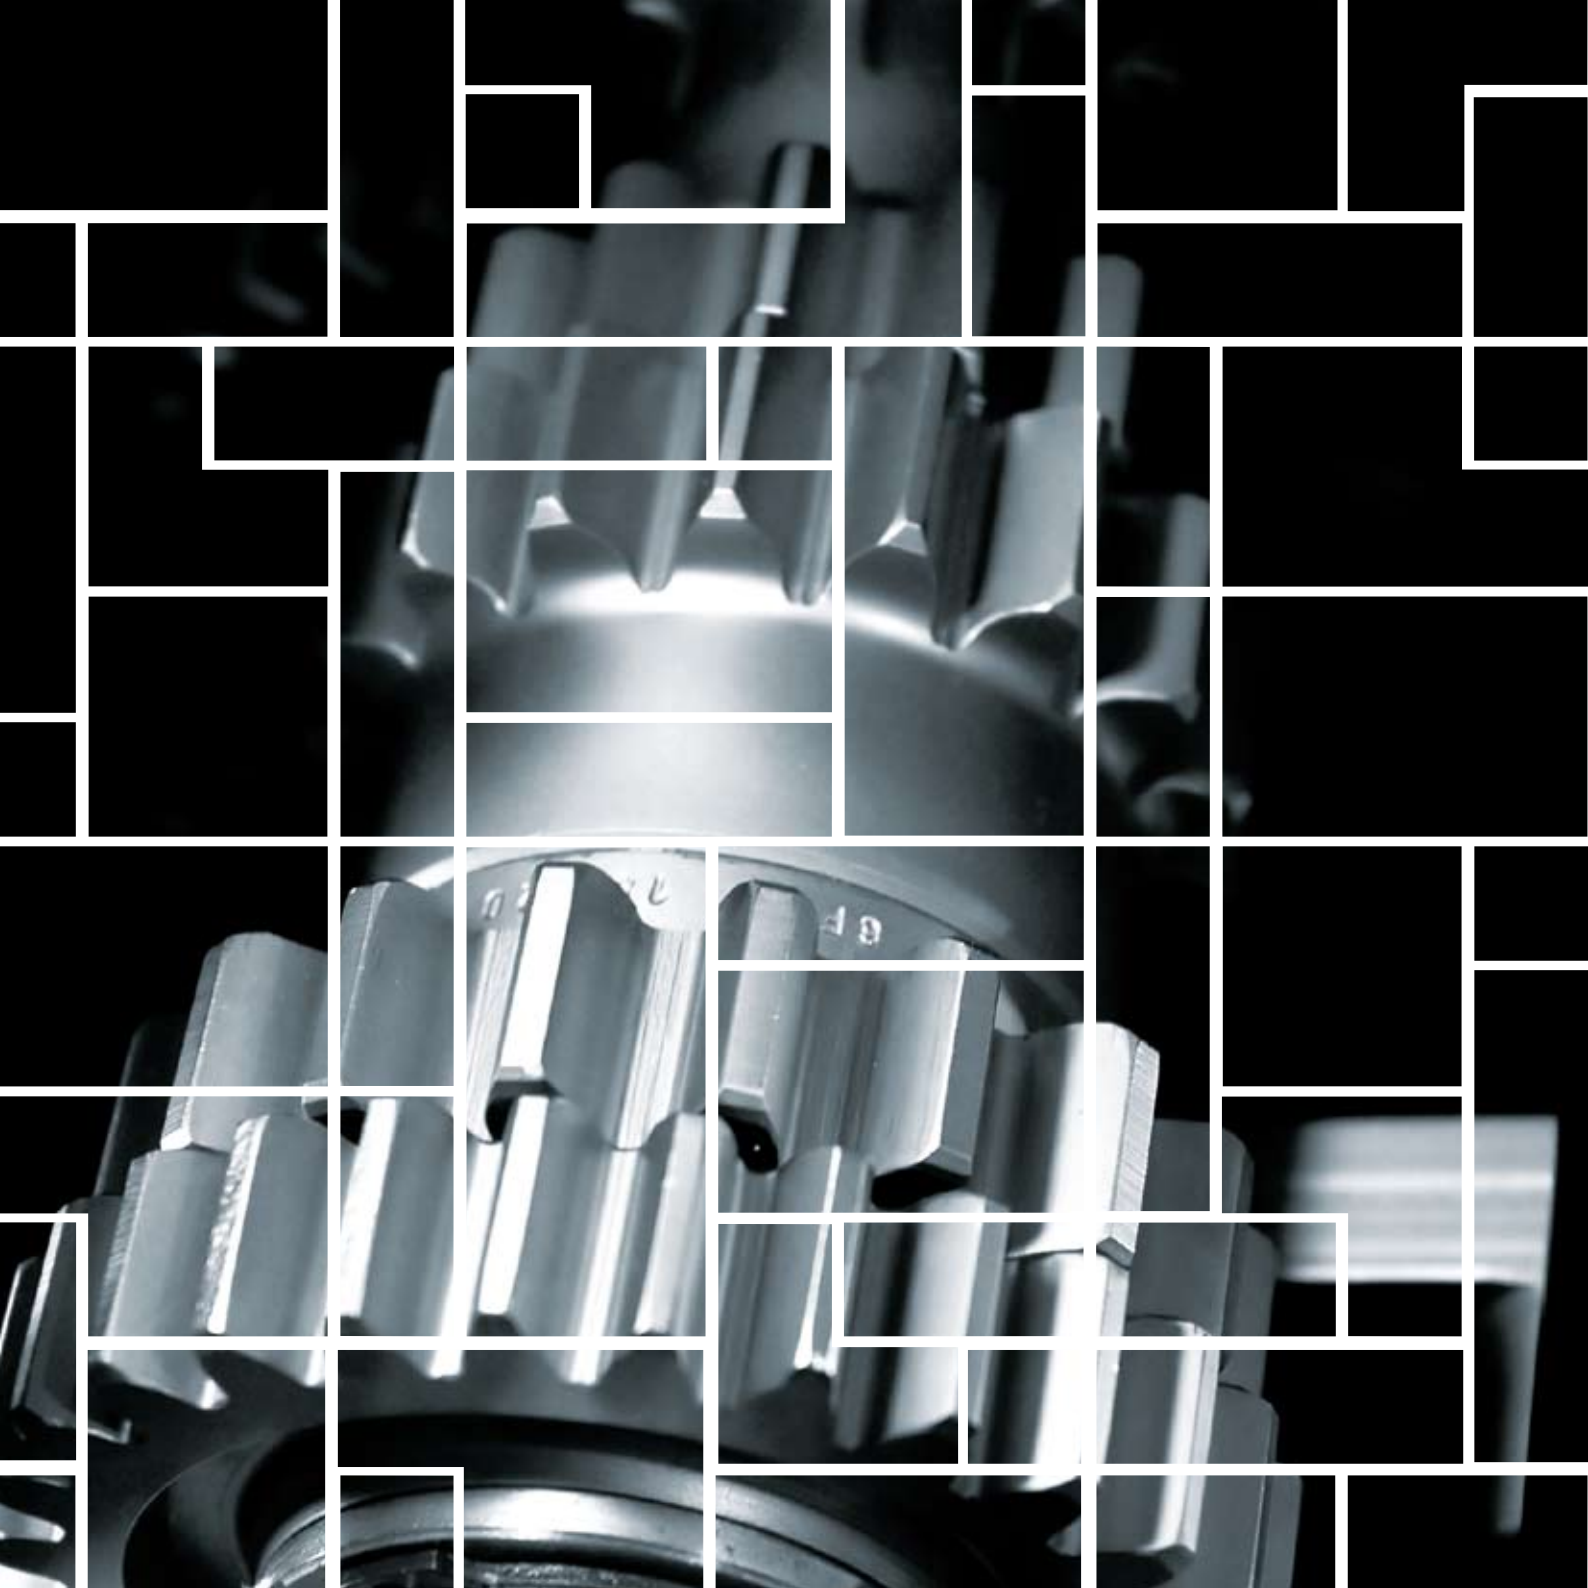

In the world of business there has never been a greater need for accurate information to help organisations make key decisions fast. Decisions that will determine whether you win or retain a vital contract. Decisions that will drive your business to meet its many compliance obligations. Everyday decisions that spark performance and have measurable impacts on your organisation's bottom line.

This is a daily reality, whether you are a large manufacturer, engineering firm, government agency or small, medium enterprises (SME's).

SO, HOW DO YOU:

- > Stay informed about the multitude of changes that occur in the world of international standards and engineering specifications?
- > Know that you are using the most up-to-date technical information?
- > Control the costs of researching, acquiring and managing your technical information?
- > Combine and integrate your own internal documents with your standards collection?

THE ANSWER IS

STANDARDS

INFOBASE

THE NATURAL SOLUTION

Standards Infobase is a market leading bibliographic database providing details on over 730,000 national, international and military standards across the entire industrialised world.

Standards Infobase is a powerful reference resource giving you detailed information and a powerful search tool on world standards from over 250 major standards bodies. It provides you with a complete management and acquisition tool geared to meet all your standards and technical document needs.

With Standards Infobase you can:

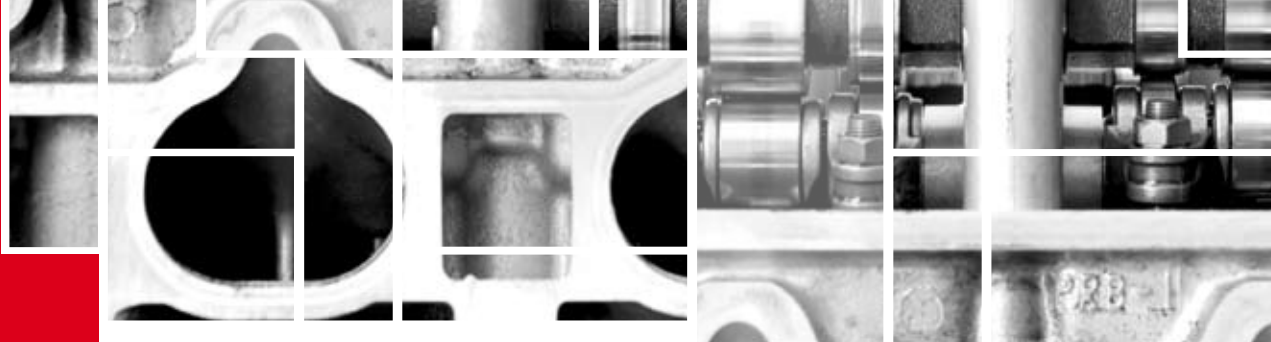

- > Search through bibliographic data on standards from around the globe.
- > Monitor any changes to the standards you need.
- > Keep up-to-date with regular email alerts.
- > Selectively purchase only the standards you need.
- > Add your own content to create a centralised technical database.
- > Manage and control your own library of standards and documents.

COMPREHENSIVE SEARCH ENGINE

- > Unparalleled content from more than 730,000 publications from over 250 major standards bodies, from the US and Europe, ISO and IEC, to Japan and Australia and many, many more.
- > Powerful search facilities allow you to search across 24 fields and cross-reference up to 10 criteria all at the one time, including number, title, text, publisher, document type and equivalency.
- > Highly detailed document information including the document number, title, version, concise summary, international equivalents, table of contents and more.
- > Documents status showing publications that are new, cancelled, superseded and “inside information” on documents that are in-development.
- > European Union Directives with links to relevant standards, and relevant EU “New Approach” Directives listing the standards required to attain the CE Mark.
- > Smart recognition of standard numbers and keywords giving maximum search flexibility, eg ISO 9001 vs ISO9001.
- > International equivalency data lets you locate and compare standards from other countries.

CONVENIENT UPDATES

- > Standards Infobase is available via the internet with convenient weekly updates.
- > It is also made available as an intranet version which is updated monthly.

BOOKMARKING

- > Standards Infobase's BookMark feature keeps you up-to-date with your own custom-selected standards as it monitors them for updates.
- > Monthly emails are sent detailing which standards from your selected list have been updated or changed.
- > Book-Mark provides a proven procedure to assist with compliance for ISO 9000 quality requirements, and removing any audit obstacles.

NOTEPAD

- > Standards Infobase's free-text facility, Notepad, allows you to insert any notes concerning your company's products or projects and will attach this information to the corresponding standard.
- > Notepad informs you of the status of a document you currently hold: whether or not it is a controlled copy, details of the project it relates to or library loan details.
- > Notes are fully searchable within the Standards Infobase system.

STANDARDS MANAGER

- > More than just a database of standards, Standards Infobase lets you import your own in-house documentation or internal standards to create a powerful technical document management tool.
- > Use the Standards Manager facility to edit, search and manage your documentation.
- > Standards Manager lets you create fully customised resource that centralises all your important documents.
- > And purchasing standards can be easily controlled, directly through your subscription. You specify the relevant gatekeepers to approve requests to purchase a standard, reducing the chance of duplicate purchases and giving you maximum purchasing control.

HUGE SAVINGS

If its powerful features weren't compelling enough, Standards Infobase subscribers can also save over 75%. Subscribers pay for only the documents they need rather than being forced to buy under-used standards packages. Using a "pay on demand" approach to buying standards means Standards Infobase customers on average **save over 75%** compared to competing standards services.

PURCHASING CONTROL

- > Purchase standards directly through the service, with prices and charges made in your own currency.
- > Standards Infobase provides the maximum amount of purchasing control on the market today. Administrators have the power to approve each document ordered, with purchase requests able to be sorted by individual user or price.
- > Users are alerted with detailed information on any standard previously ordered.
- > Many documents can be directly downloaded over the web in PDF format, with around 60,000 standards currently available for immediate download.

BUSINESS BENEFITS AT A GLANCE

- > Save up to 75% when compared to other competing standards-based packages.
- > Time saved in sourcing and monitoring standards means you have more time for your business.
- > Details of over 730,000 world standards, from 250+ SDOs.
- > 60,000+ documents in PDF for immediate delivery.
- > Takes the guesswork out of document management for ISO 9000 compliance.
- > Powerful search tool cross references over 10 different search fields at one time.
- > Holds all orders for management approval.
- > View all previous orders made by your company.
- > User-friendly document purchasing system.
- > Weekly updates with personal emails on your updated documents.
- > Advanced user management features.
- > Add your own searchable content.

MORE SUBSCRIPTION SERVICES FROM SAI GLOBAL

SAI Global offers a range of standards and technical subscription services that help make all the parts of your business fall into place.

STANDARDS ON-LINE PREMIUM

Standards On-Line Premium is our flagship service, designed for heavy users of standards. It gives you full-text access to the entire database over 8,000 Australian Standards® and optional access to over 59,000 international standards including ISO, IEC & EN. It makes the task of using and managing large libraries of standards easy.

STANDARDS ON-LINE SELECT

Small to medium-sized users of standards know that Standards On-Line Select is the ideal tool to meet all of their standards needs. Full-text access to Australian and International Standards is provided, tailored specifically to meet your business needs. With its self-service facility letting you select and manage your standards at any time, this is our most popular subscription service.

LOGICOM - US MILITARY & LOGISTICS DATABASE

LOGICOM is the definitive online annual subscription providing a comprehensive database of US military parts and suppliers, and US Government logistics. Use LOGICOM to increase the efficiency of your design, testing, and quality assurance processes, to save money and win business.

METALS INFOBASE

Metals Infobase is a market leading database on metal grades and properties, suppliers and metallurgical standards. It is an annual, networkable, subscription service that includes over 75,000 metal grades giving the chemical composition, mechanical and physical properties, form and heat treatment details.

EUROLAW

EuroLaw is our full-text legal database of the European Union. It comprises the official Celex database plus vital information added by SAI Global's experts. If you need failsafe access to European legislation then EuroLaw will answer your questions and save you both time and money.

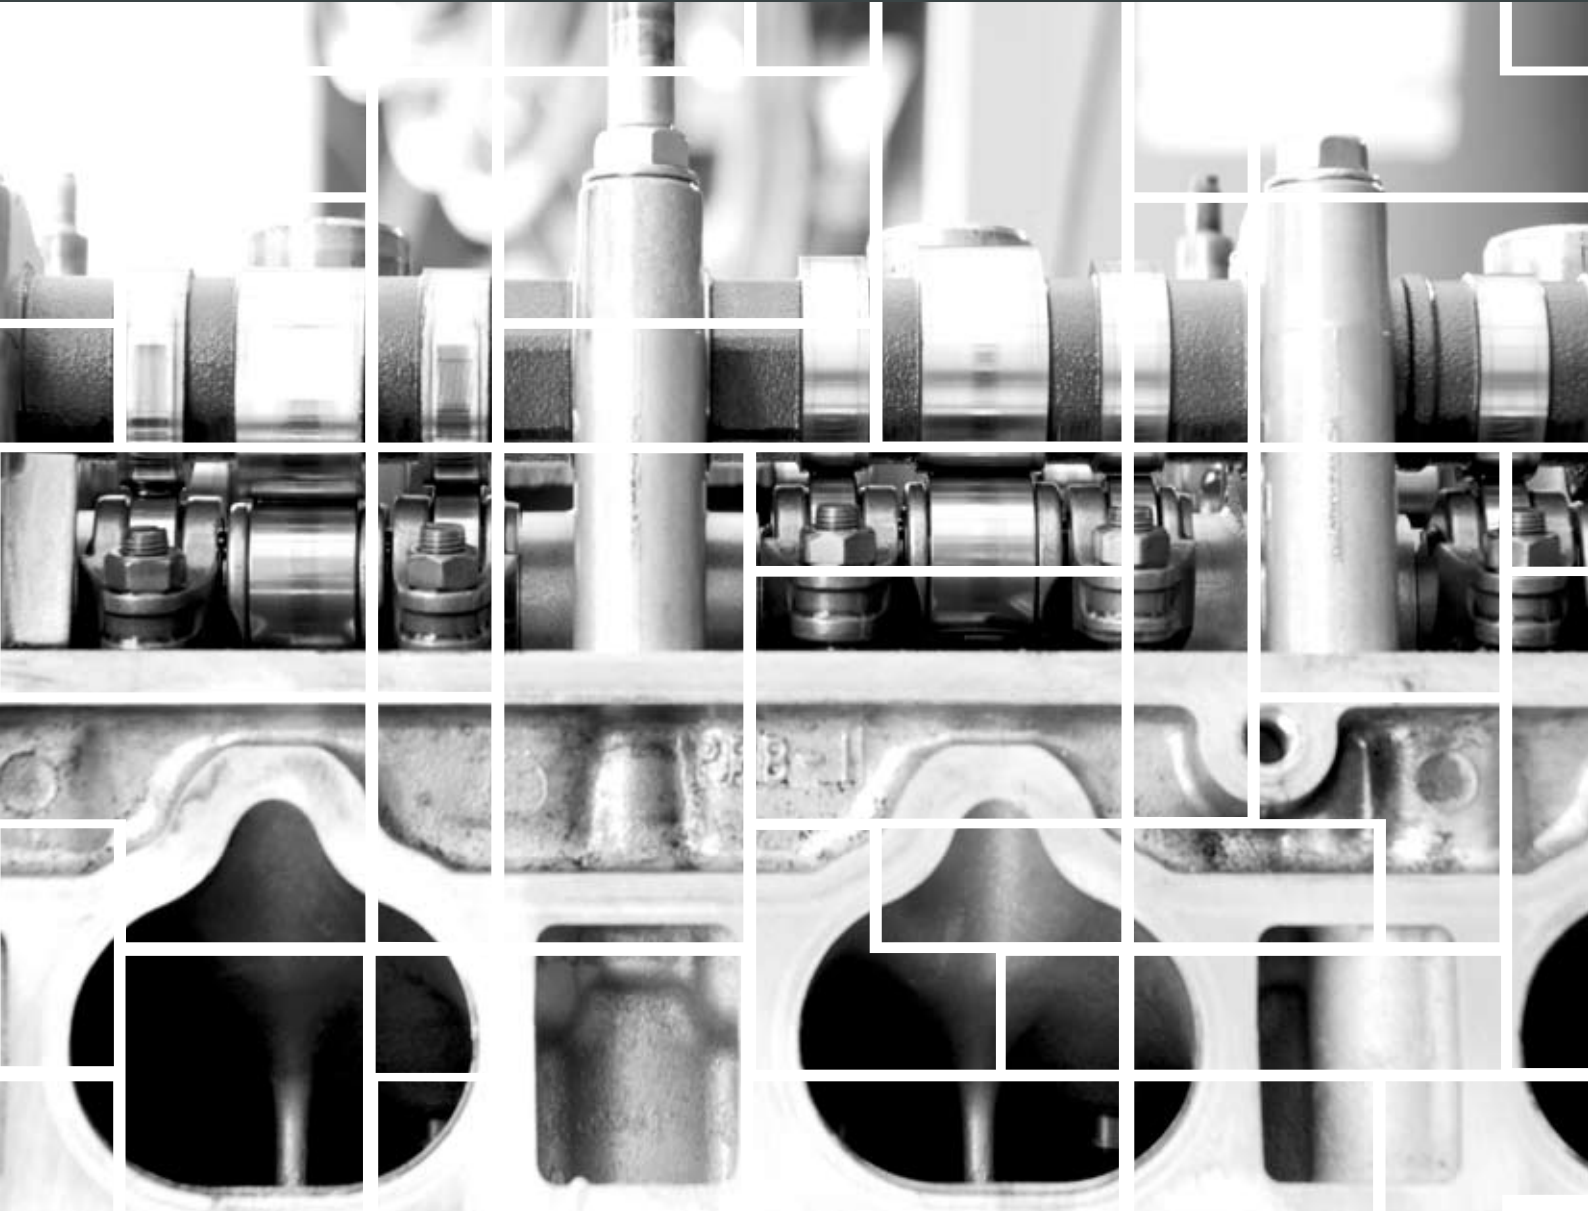

MATERIALS INFOBASE

Materials Infobase provides detailed information on tens of thousands of worldwide non-metallic materials and suppliers. Comprehensive search facilities help you identify the right materials for your application, equivalents products and where to source them in seconds. With powerful management tool, Materials Infobase makes the challenge of sourcing materials easy.
