Australian/New Zealand Standard™

Performance of household electrical appliances—Clothes washing machines

Part 2: Energy efficiency labelling requirements

AS/NZS 2040.2:2005

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-015, Quality and Performance of Household Electrical Appliances. It was approved on behalf of the Council of Standards Australia on 29 November 2005 and on behalf of the Council of Standards New Zealand on 9 December 2005.

This Standard was published on 22 December 2005.

The following are represented on Committee EL-015:

Office of the Technical Regulator (SA)

Australian Consumers' Association
Australian Electrical and Electronic Manufacturers Association
Australian Industry Group
Australian Retailers Association
Business New Zealand
Consumer Electronics Suppliers Association
Consumers' Federation of Australia
Department of Energy, Utilities and Sustainability (NSW)
Department of Industrial Relations (Qld)
Electrical Compliance Testing Association
Energy Efficiency and Conservation Authority of New Zealand
Institution of Professional Engineers New Zealand
National Appliance and Equipment Energy Efficiency Committee
National Association of Testing Authorities Australia
Office of the Chief Electrical Inspector

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 05250.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL/15, Quality and Performance of Household Electrical Appliances to supersede AS/NZS 2040.2:2000 on publication.

The AS/NZS 2040 series is comprised of two Parts, as follows:

AS/NZS

2040 Performance of household electrical appliances—Clothes washing machines 2040.1 Part 1: Methods for measuring performance, energy and water consumption 2040.2 Part 2: Energy efficiency labelling requirements (this Standard)

The overall objective of the AS/NZS 2040 series is to promote high levels of performance, energy efficiency and water efficiency in clothes washing machines.

The Parts of AS/NZS 2040 are summarized as follows:

- (a) Part 1 Includes performance test procedures and minimum performance criteria for clothes washing machines.
- (b) Part 2 Includes algorithms for the calculation of the energy efficiency star rating and comparative energy consumption, performance requirements, details of the energy efficiency label and requirements for the valid application for registration for energy efficiency labelling. It also includes the application form for registration for water efficiency labelling. It has been structured to be suitable for reference in regulatory legislation and to be used in conjunction with Part 1.

The main changes in this Standard are as follows:

- (i) Introduction of new application form details and procedures for registration for energy efficiency labelling and water efficiency labelling.
- (ii) Introduction of a requirement to pass the rinse performance test of AS/NZS 2040.1:2005 (also included in Amendment 1 to AS/NZS 2040.2:2000).
- (iii) Refinement of cold wash and warm wash program descriptions.
- (iv) Inclusion of standby power into the energy efficiency label calculations.
- (v) Introduction of a requirement to enable a regulator to be able to determine the date of manufacture from information marked on the appliance.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

Statements expressed in mandatory terms in notes to tables and figures are deemed to be requirements of this Standard.

This Standard is published with the approval of the relevant Australian and New Zealand regulatory authorities and is structured to be suitable for reference in energy and water efficiency labelling regulatory legislation. It refers to AS/NZS 2040.1:2005 for test procedures. AS/NZS 6400 references this Standard for water efficiency labelling requirements.

From the date of publication of this Standard until 31 March 2007, regulatory authorities have advised that they will accept registration of clothes washing machines in accordance with either AS/NZS 2040.2:2000 or this Standard.

Regulatory authorities have advised that from 31 March 2007, all new registrations or changes to existing registrations submitted in Australia, and new records or changes to existing records kept in New Zealand, will need to meet the requirements of this Standard.

Regulatory authorities have advised that registrations which rely on test reports to AS/NZS 2040.1:1998 (as amended) or where products are registered to the requirements of AS/NZS 2040.2:2000 will expire on 31 March 2007. All products imported or manufactured after 31 March 2007 will require a registration and an energy label in accordance with this Standard.

Administrative arrangements during the transition period may vary so registration holders should contact their regulator to obtain detailed requirements with respect to labelling and registration requirements (refer also to Section 4 of this Standard).

Check testing, where applicable, will be undertaken to the version of the test Standard which has been used to support the current energy efficiency label for that model.

Australian/New Zealand Standard

Performance of household electrical appliances—Clothes washing machines

Part 2: Energy efficiency labelling requirements

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard specifies the energy efficiency labelling requirements for electric **clothes** washing machines intended for household and similar use. This Standard does not specify safety requirements. Examples of appliances covered by this Standard are top loading non-drum type washers (usually impeller or agitator), front and top loading drum type washers and the washer function of combination washer-dryers.

In particular, this Standard specifies the following:

- (a) Program for energy efficiency labelling and water efficiency labelling.
- (b) Comparative energy consumption (CEC).
- (c) Star rating for energy efficiency labelling.
- (d) Requirements for energy efficiency label validity.
- (e) Performance criteria for energy efficiency labelling.
- (f) Printing requirements for clothes washing machine energy efficiency labels.
- (g) Format for the application for registration for energy efficiency labelling and water efficiency labelling.

1.2 APPLICATION

This Standard shall be read in conjunction with AS/NZS 2040.1:2005.

1.3 OBJECTIVE

The objective of this Standard is to define performance and energy efficiency labelling requirements that a **clothes washing machine** has to meet in order to carry a valid energy efficiency label.

1.4 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

The following documents are referred to in this Standard.		
AS 2706	Numerical values — Rounding and interpretation of limiting values	
AS/NZS 2040 2040.1:2005 2040.2:2000	Performance of household electrical appliances—Clothes washing machines Part 1: Methods for measuring performance, energy and water consumption Part 2: Energy efficiency labelling requirements	
6400	Water efficient products—Rating and labelling	
62301	Household electrical appliances—Measurement of standby power
