

# Personal Care

## Manufacturing Assessment Program

*Developed in Alliance with the Personal Care Products Council*

### PCMAP - Understanding and Implementing Course

*New Course Developed in Alliance with the Personal Care Products Council*

**2 Day Course | \$1,145 per person | 1.4 CEUs**

*“As of 11 July 2013, the European Union’s Regulation (EC) No 1223/2009 will require cosmetic products to be manufactured according to Good Manufacturing Practices (GMPs). Cosmetics manufacturers should prepare for this new requirement now in order to avoid any potential loss of market approval”*

#### **COURSE OBJECTIVES**

This 2-day interactive training course will help you understand the essential components required to implement a quality and safety management system that ensures the proper production, control, storage and shipment of your cosmetic product. This course not only complies with new GMP requirements in the EU, but also builds an effective management system infrastructure that is based on the internationally recognized ISO 22716 standard.

ISO 22716 has marked a major step in the realization of a globally recognized standard for cosmetic products safety, which has enabled cosmetic manufacturers and suppliers to exceed customer needs and expectations.

A key aspect of this training is that the supply chain is being viewed as a ‘tiered’ structure with multiple Risk Level Categories, helping to drive the requirements to different levels depending on the criticality of the supplier.

#### **KEY SESSION TOPICS**

- Introduction to regulatory (domestic and international) requirements
  - ISO 22716
  - 21 CFR 210/211
  - ISO 9001:2008
- In-depth review of ISO 22716
- Supply chain tier structure and applicable requirements for each tier

- Benefits of GMP processes
- Planning for a successful implementation
- Integration of Risk Management with Corrective and Preventive Action
- Impact on QMS success and field performance
- Key lessons learned that impact certification

PCMAP is based on the Council’s ‘Quality Assurance Guidelines’ and participants should order them directly from the Council – [www.personalcarecouncil.org](http://www.personalcarecouncil.org).

An optional written exam is conducted at the end of the course to ensure attendees achieve the necessary competencies to implement a system that conforms to ISO 22716.

#### **COURSE DATES - Register Now!**

December 20 - 21      Cleveland - OH  
January 17 - 18      Somerset - NJ

For additional 2012 course dates visit [www.saiglobal.com/pcmap](http://www.saiglobal.com/pcmap).

#### **WHO SHOULD ATTEND**

- Functional managers
- Regulatory Personnel
- Engineers (Quality, Manufacturing/Process, Design)
- Process owners
- Internal and External Auditors of Quality Management Systems
- Steering Committee Team Members

#### **PREREQUISITE**

Prior knowledge of ISO 9001, and/or FDA 21 CFR 210/211 is highly recommended.

**For long lasting product quality and safety - apply PCMAP to your entire product supply chain process.**
