

POLICY NUMBER 6

**22 JUNE 2004
REISSUED JUNE 2005**

Environmental Policy

SAI Global recognises that the protection and conservation of the natural environment is an important element in its social responsibilities. It is therefore committed to the continuous improvement in its environmental performance and in minimising any adverse environmental impacts throughout its business operations.

SAI Global is committed to the protection of the environment through the minimisation of waste, the responsible consumption of resources, the efficient use of energy, and the prevention of pollution.

To ensure this commitment is fulfilled, SAI Global will apply environmental management principles and practises conforming to ISO 14000 in all its business activities.

In accordance with this Policy, the company will:

1. Ensure our staff are aware of their responsibilities relating to environmental management and actively seek opportunities to improve environmental performance.
2. Establish and encourage group-wide programs to identify improvement objectives in areas such as energy use, recycling, waste minimization and the avoidance of pollution. Set measurable improvement targets and ensure progress towards the achievement of these targets is subject to regular management review.
3. Ensure that SAI Global's commitment to superior environmental outcomes is communicated to employees, contractors, suppliers and customers.
4. Promote our commitment to environmental management systems that fulfil the principles of ISO 14000
5. Conduct all activities to meet and exceed mandatory environmental legislation and regulations.
6. Where appropriate, participate in external environmental improvement initiatives.
