

Australian Standard™

**Timber—Hardwood—Sawn and milled
products**

Part 2: Grade description

This Australian Standard was prepared by Committee TM-007, Sawn, Milled and Speciality Timber Products. It was approved on behalf of the Council of Standards Australia on 6 February 2006.
This Standard was published on 10 March 2006.

The following are represented on Committee TM-007:

A3P
Australian Paint Manufacturers Federation
Construction Information Systems Australia
Department of Primary Industries and Fisheries Queensland
Forest Products Commission (WA)
Forests NSW
Furntech
Housing Industry Association
Master Builders Australia
National Wood Flooring Industry Association of Australia
New Zealand Timber Industry Federation
New Zealand Timber Suppliers Group
Tasmania Timber Promotion Board
Timber Development Association, NSW
Timber Queensland

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 03024.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TM-007, Sawn, Milled and Speciality Timber Products, to supersede AS 2796.2—1999. After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Standard is to provide producers and users with grading rules for sawn and milled hardwood products for use when specifying such products intended for use in building applications.

The objective of this revision is to update the following grade descriptions:

- (a) Hole measurement.
- (b) Hobnail measurement.
- (c) Concealed surface requirements.
- (d) Colour variation within species.

This Standard is Part 2 of the AS 2796 series, which is comprised of the following parts:

AS

2796 Timber—Hardwood—Sawn and milled products

2796.1 Part 1: Product specification

2796.2 Part 2: Grade description (this Standard)

2796.3 Part 3: Timber for furniture components

This Standard describes grades for most products based on the level of feature in each grade.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

Australian Standard

Timber—Hardwood—Sawn and milled products

Part 2: Grade description

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard describes four grades for products sawn or milled from hardwood.

NOTES:

- 1 The coverage by this Standard of all hardwood species does not imply their availability nor the availability of every grade in any species or species group.
- 2 Milled timber for window frames, sashes and sills is specified in AS 2047.
- 3 Timber for furniture components is specified in AS 2796.3.
- 4 This Standard may be used as a basis for a third party product certification scheme.
- 5 Natural colour variations are to be expected within a species. Some species exhibit only small variations while in others colour varies greatly. Differences may occur between growing regions and the age of tree may also have a significant influence. In some species, the colour of the sapwood may differ markedly from the colour of the heartwood. Such natural colour variations are not covered by this Standard.

1.2 APPLICATION

The grade descriptions given in this Standard are for use with the sawn and milled timber products specified in AS 2796.1 (see Clause 1.7). The grade descriptions are listed in Appendix A.

NOTE: A summary of the grade descriptions is given in Appendix B; however, it is not exhaustive and does not take the place of the requirements set out in this Standard. Reference should be made to the appropriate Sections of this Standard for a complete description of the grades.

1.3 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

- | | |
|--------|---|
| 2047 | Windows in buildings—Selection and installation |
| 2796 | Timber—Hardwood—Sawn and milled products |
| 2796.1 | Part 1: Product specification |
| 2796.3 | Part 3: Timber for furniture components |

AS/NZS

- | | |
|----------|---|
| 1080 | Timber—Methods of test |
| 1080.2.1 | Method 2.1: Slope of grain by scribe |
| 1080.2.2 | Method 2.2: Slope of grain by reference to surface checks |
| 1080.2.3 | Method 2.3: Slope of grain by splintering |
| 4491 | Timber—Glossary of terms in timber-related Standards |
