Australian Standard®

Design and installation of sheet roof and wall cladding

Part 3: Plastic

This	Australian	Standard® wa	as prepared	by Committee F	PL-022,	Plastic Building	Sheets. It
was	approved	on behalf of th	e Council of	f Standards Aus	tralia on	30 May 2006.	
This	Standard	was published	on 30 June	2006.			

The following are represented on Committee PL-022:

- Australian Building Codes Board
- Australian Industry Group
- CSIRO, Manufacturing and Infrastructure Technology
- Composites Institute of Australia
- Plastics and Chemicals Industries Association
- University of Adelaide

This Standard was issued in draft form for comment as DR 03151.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

Australian Standard®

Design and installation of sheet roof and wall cladding

Part 3: Plastic

Originated in Australia as part of AS 2424—1981.
Previous edition AS 2424—1991.
AS 2424—1991 and AS 2921—1987 revised, amalgamated and redesignated in part as AS/NZS 1562.3:1996.
Revised and redesignated as AS 1562.3—2006.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee PL-022 on Plastic Building Sheets, to supersede AS/NZS 1562.3:1996.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

This Standard is part of a series of sheet roof and wall cladding which, comprises the following:

AS

1562	Design and	installation	of sheet roof	and wa	ll cladding

1562.1 Part 1: Metal

1562.3 Part 3: Plastic (this Standard)

AS/NZS

Design and installation of sheet roof and wall cladding

1562.2 Part 2: Corrugated fibre-reinforced cement

Plastic roof and wall cladding materials are installed using the normal procedures for other types of building sheets but with certain modifications to fixing techniques because of the inherent properties of the material. The purpose of this Standard is to reinforce general safety rules in relation to sheet installation and to highlight the differences in fixing techniques required for plastic sheets as compared with those used for sheets of other materials.

This Standard is to be used in conjunction with the suite of Standards on plastic roof and wall cladding materials, which comprise the following:

AS

4256	Plastic roof and wall cladding materials
4256.1	Part 1: General requirements

4256.2 Part 2: Unplasticized polyvinyl chloride (uPVC) building sheets

4256.3 Part 3: Glass fibre reinforced polyester (GRP)

4256.4 Part 4: Unplasticized polyvinyl chloride (uPVC) wall cladding and boards

4256.5 Part 5: Polycarbonate

The main changes to the previous edition are as follows:

- (a) To develop the Standard as an Australian Standard.
- (b) Deletion of Appendices B and C and inclusion of reference to AS/NZS 4389 for safety mesh specification.
- (c) Clarification on the intent of the Standard regarding the application of safety mesh in relation to the support conditions of the sheet.

The term 'normative' has been used in this Standard to define the application of the appendix to which it applies. A 'normative' appendix is an integral part of a Standard.

STANDARDS AUSTRALIA

Australian Standard Design and installation of sheet roof and wall cladding

Part 3: Plastic

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard sets out procedures for the design and installation of plastic roof and wall cladding materials for walls and roofs.

The Standard is primarily intended to apply to the use of plastic roof and wall cladding materials complying with the AS 4256 suite of Standards.

NOTES:

- 1 The sheets do not contribute to the structural or loadbearing capacity of the structure and due allowance should be made to the surrounding structure to compensate for the opening areas. For applications where structural design requirements must be satisfied, reference should be made to the design and testing provisions of AS 1562.1 for roofing without transverse joints.
- 2 For use of the sheets in abnormal environmental conditions (e.g. extremes of temperature), the advice of the manufacturer should be sought.

1.2 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:
