

Australian Standard™

Smoke alarms

This Australian Standard was prepared by Committee FP-002, Automatic Fire Detection and Alarm Systems. It was approved on behalf of the Council of Standards Australia on 1 March 1993 and published on 13 April 1993.

The following are represented on Committee FP-002:

Australian Assembly of Fire Authorities
Australian Association of Rural Fire Authorities
Australian Chamber of Commerce and Industry
Australian Chamber of Manufactures
Australian Electrical and Electronic Manufacturers Association
Australian Fire Protection Association
Australian Uniform Building Regulations Coordinating Council
Civil Aviation Authority
Commonwealth Fire Board
CSIRO, Division of Building, Construction and Engineering
Department of Administrative Services
Federal Bureau of Consumer Affairs
Fire Brigades, New South Wales
Fire Protection Industry Association of Australia
Insurance Council of Australia
Telecom Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 92109.

Australian Standard™

Smoke alarms

First published as AS 3786 — 1990.
Second edition 1993
Reissued incorporating Amendment No. 1 (April 1995)
Reissued incorporating Amendment No. 2 (December 1995)
Reissued incorporating Amendment No. 3 (November 2001)
Reissued incorporating Amendment No. 4 (April 2004)

PREFACE

This Standard was prepared by the Standards Australia Committee FP-002, Automatic Fire Detection and Alarm Systems to supersede AS 3786—1990, *Self-contained smoke alarms*.

This Standard incorporates Amendment No. 1 (April 1995), Amendment No. 2 (December 1995), Amendment No 3 (November 2001) and Amendment No. 4 (April 2004). The changes required by the Amendments are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

Alterations to the previous edition are as follows:

- (a) The term ‘self-contained’ has been deleted from the title and in the body of this Standard in recognition that the scope of this Standard includes externally energized smoke alarms.
- (b) Clauses for new designs and innovations, and interpretations have been added.

STANDARDS AUSTRALIA

Australian Standard
Smoke alarms

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard specifies requirements for the design and performance of electrically operated smoke alarms containing both detection and alarm facilities.

This Standard allows, although it does not require, the inclusion within the smoke alarm of facilities for interconnection with other similar units, or accessories. Where such facilities are included, this Standard specifies requirements for the connection interface. However, such an interface is not intended for connection to fire control stations.

This Standard applies to smoke alarms intended for installation within residential accommodation where connection to fire control stations is not required.

1.2 APPLICATION

A3 | A network of interconnected smoke alarms shall not be substituted for installations which require compliance with AS 1670.1.

The test methods included in this Standard are intended to assess the suitability of smoke alarms solely for residential applications.

A4 | **1.3 'Not applicable'**

1.4 INTERPRETATIONS

Questions concerning the meaning, the application, or effect on any part of this Standard may be referred to the SA Committee on Automatic Fire Detection and Alarm Systems. The authority of the committee is limited to matters of interpretations and it will not adjudicate in disputes.

1.5 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

STANDARDS

AS

A3	1319	Safety signs for the occupational environment
	1670	Fire detection, warning, control and intercom systems—System design, installation and commissioning
	1670.1	Part 1: Fire
	1670.2	Part 2: Local fire
	1670.6	Part 6: Smoke alarms
	2362	Automatic fire detection and alarm systems—Methods of test for actuating devices
	2362.4	Method 4: Voltage stability test
	2362.5	Method 5: Insulation resistance test
