

# Roam – Empower your mobile workforce

As global markets rapidly transform, companies need agile and mobile workforces with tools that enable collaboration, greater productivity and better business outcomes

To reduce the cost and complexity of managing environmental, health, safety (EHS) and operational risks, managers are embracing mobile solutions to innovate and transform EHS and Operational Risk processes that delivers business value.

## Cut out redundant tasks and become fully paperless

Roam is a native mobile app that enables information such as incidents and accidents, near misses, hazards, inspections, safe behaviour observations, audits, toolbox talks to be captured, anytime and anywhere even when offline. It is intuitive and easy to use for high user adoption and buy-in for your EHS initiatives. With speech-to-text, geo-location tracking, and ability to take and attach photos, workers will find it easy and fast to capture data. Companies gain the benefit of real-time EHS information that can be acted on quickly.

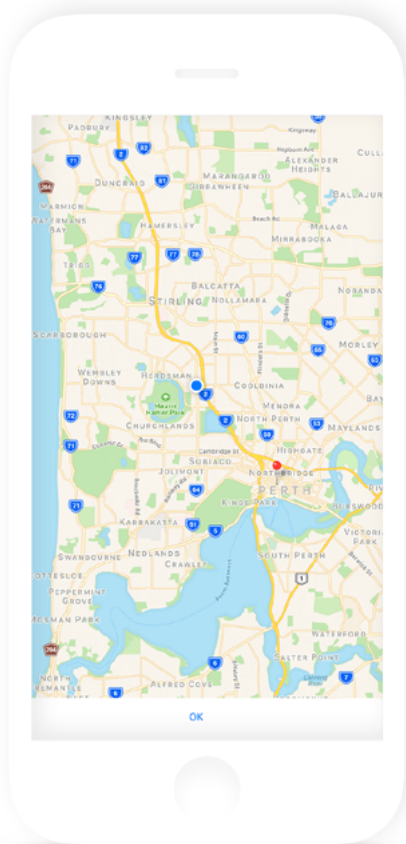

# Get more value from SAI360's EHS and Operational Risk Software

Roam is the perfect companion to our SAI360's EHS and Operational Risk web application, and is much more than a data capture tool. All forms and workflows available in the web application can be made available through Roam, allowing users to manage EHS and Operational Risk processes from their mobile devices. Forms and workflows are fully configurable so it can be tailored to your unique business needs.

## Connect and Engage Workers in managing EHS and Operational Risk

Via the Roam mobile app, workers can view and complete all tasks that have been assigned to them such as Actions, Investigations, Audits & Inspections, Critical Control Verification. Roam's instant notifications allows real-time messaging of assigned tasks, safety alerts or any urgent information to be sent to workers out in the field. Workers can also search and access critical information such as Hazards, Incidents, Chemicals, Job Safety Analysis to make informed based decisions when undertaking a task.
