

Vendor Risk Management with SecurityScorecard

While there's no silver bullet to stopping hacks completely, SAI360's Vendor Risk Management solution with our SecurityScorecard partnership is a great place to start.

Manage vendor and third-party risks with SAI Global's vendor risk management and SecurityScorecard solution

Business leaders know that to boost innovation within an organization they have to take risks by adding fresh technology solutions. But the Catch-22 is that adding third- and fourth-party vendor technologies certainly provides strategic business advantages, but also unpredictable risks and more holes for hackers to exploit.

Organizations are realizing that cybersecurity is now made up of more than the standard IT security infrastructure. Vendor risk management also plays a critical role in building a strong and resilient security posture. Regulatory requirements such as PCI DSS and GDPR extend their reach to vendors and contractors.

In today's highly regulated and competitive business environment, automation is essential to effectively manage the extended digital risk ecosystem. The ability for your organization to track and automate activities is critical to reducing the risk of non-compliance, while improving your overall risk and security posture.

Automate vendor management and optimize risk mitigation

You need a solution to help you identify, evaluate and manage vendor risk so you can put trust in your decisions of which risks are truly worth taking. SAI Global's solution for vendor risk management (VRM) allow organizations to securely expand their extended network of third-party vendors and save time in the process. Using SAI360 for Digital Risk Software platform, your company can perform vendor risk assessments more efficiently and effectively without the traditional use of unreliable email and spreadsheets. By automating key aspects of VRM you can:

- Perform additional analysis on vendor criticality;
- Improve vendor relationships;
- Report on security and compliance based activities and departments that your vendors support and;
- See the results of your risk findings are traceable and in one location.

Your organization can now leverage one powerful platform to automate assessments and mitigate high-priority risks with efficiency. SAI360 for Digital Risk: Software:

- Automates the VRM process end-to-end;
- Scales to manage hundreds to thousands of vendors;
- Monitors workflow and progress;
- Integrates vendor scoring data;
- Consolidates your risk data; and
- Enables you to adapt your reporting to get a true picture of your vendor risk profile.

Always-on Vendor Cybersecurity Risk Monitoring

For a true 360-degree view of your vendor risk, get automated cybersecurity risk scores from SAI360 for Vendor Risk powered by SecurityScorecard, providing continuous monitoring of your third-party security risks.

Our SecurityScorecard integration supplements your risk assessment processes, ensuring that results can be substantiated and validated using a risk-based approach. Each vendor receives a security rating and score that reflects their current security posture. A lower rating and score help you identify the high-priority vendors that need more intensive assessments, such as penetration tests or on-site assessments.

Since the system is always monitoring for new data, you are alerted when a vendor's security is compromised, or if there is a decrease in a vendor's security rating. The solution offers multi-level insights: full-time observation of all externally visible (hacker view) vulnerabilities across the entire Internet; plus inferred organizational behavior analytics.

About Our Award-Winning Software

SAI Global's SAI360 for Digital Risk Software is changing how customers assess their risks. By leveraging thousands of out-of-the-box controls and regulations and predefined automated workflow, our clients realize quick time-to-value. SAI Global helps our customers keep risks aligned with enterprise risk appetites while remaining compliant with policies and regulations. Our risk solutions have been consistently well-rated for customer satisfaction and by leading market analysts. The software continually wins five stars from SC Magazine labs, has won the SC Magazine Innovator-Of-The-Year award, and received the GRC Value Award from GRC 20/20.

Solution Benefits

- Accurately classify vendor assessment requirements
- Prioritize remediation of high priority risks
- Automate data collection processes needed to generate executive level reports necessary for key risk-taking decisions
- Support multiple levels of predefined vendor assessments, allowing you to go as deep as you need depending on vendor criticality
- Automate risk assessments of your vendors and validate with integrated vendor risk scores
- Respond quickly if a vendor is breached
- Adhere to your regulatory requirements such as PCI DSS and GDPR
- Access through the cloud or installed on-premise

Key Solution Features

- Access to a knowledge library complete with over 1,000 controls and compliance sets, as well as the Standard Information Gathering Agreement (SIG)
- Pre-configured surveys that are mapped to industry standard control and compliance frameworks
- Asset management tools to classify and map vendors based on their criticality and relevance to the business
- Automated cybersecurity risk scores for vendors from integrations with continuous monitoring solutions such as SecurityScorecard
- Risk and compliance management solutions for performing a wide range of VRM and related projects
- Apps for iPhone, iPad, and Android for performing on-site questionnaires and monitoring risk remediation
- Digital audit trail of activities associated with VRM
- Out-of-the-box risk intelligence (RI) reporting to communicate VRM efforts at a high level or with detailed granularity

About SAI Global

SAI Global helps organizations proactively manage risk to create trust and achieve business excellence, growth, and sustainability. Our integrated risk management solutions are a combination of leading capabilities, services and advisory offerings that operate across the entire risk lifecycle allowing businesses to focus elsewhere. Together, these tools and knowledge enable clients to develop an integrated view of risk. To see our tools in action, request a free demo.

We have global reach with locations across Europe, the Middle East, Africa, the Americas, Asia and the Pacific. For more information visit www.saiglobal.com.
