

Digital Manager 360

SAI Global's Digital Manager 360 is the leading global IT Risk, Governance and Compliance management software.

Businesses are striving to remain competitive and agile by investing in expanding their digital infrastructures. But these investments, if not properly and consistently governed, increase the risk to the business. Due to this consistently evolving technology and threat landscape, managing technology risk is a daily challenge even for the most judicious IT governance professional. The good news is there is now a solution to this problem!

SAI Global's Digital Manager 360 enables your cybersecurity taskforce to simplify and manage digital risk and compliance across the enterprise and extended vendor network. Information technology security and compliance professionals use Digital Manager 360 to assess and monitor adherence to internal and external frameworks across the enterprise and third-party relationships.

Our IT GRC offering includes:

- IT Vendor Risk Management
- Vulnerability Risk Management
- Digital Compliance Management
- Digital Enterprise Risk Management
- Business Continuity Management
- Digital Incident Management
- Digital Asset Management

All in a flexible and affordable software package specifically designed for out-of-the-box deployment.

AUTOMATE YOUR IT GOVERNANCE PLATFORMS AND PROTECT YOUR BUSINESS

Manual IT GRC processes leave businesses vulnerable to failure, inefficiencies and cyber attacks. Digital Manager 360 provides a single, scalable cloud-based platform with proven capabilities to help you reduce digital risk right away. Digital Manager 360 also has the versatility to be installed on-premise. Designed by IT risk managers for IT risk managers, you'll gain deeper and more reliable insight after implementing our award-winning IT GRC software.

ALIGN PROCESSES TO BEST PRACTICE - PLAN, DO, CHECK, ACT

Digital Manager 360 adheres to proven processes and international standards. Now you can ensure your digital business does too. Save time by integrating with existing tools, including single sign-on and vulnerability scanners.

Prioritise and support decision-making through quantitative and qualitative reports on identified leading and trailing risk indicators.

CENTRALISE IT RISK AND COMPLIANCE FOR PEAK PERFORMANCE AND RESULTS

Leveraging one of the largest databases of standards, controls and frameworks - maintained by our GRC experts, watch your business run smoother.

Scale your GRC activities over time to include vendor, business continuity and enterprise risk management.

BENEFITS

Comprehensive cost saving tool

Integrated platform automating the entire IT GRC management life-cycle. Reduce costs, automate tasks, and improve consistency.

Quick implementation - out-of-the-box

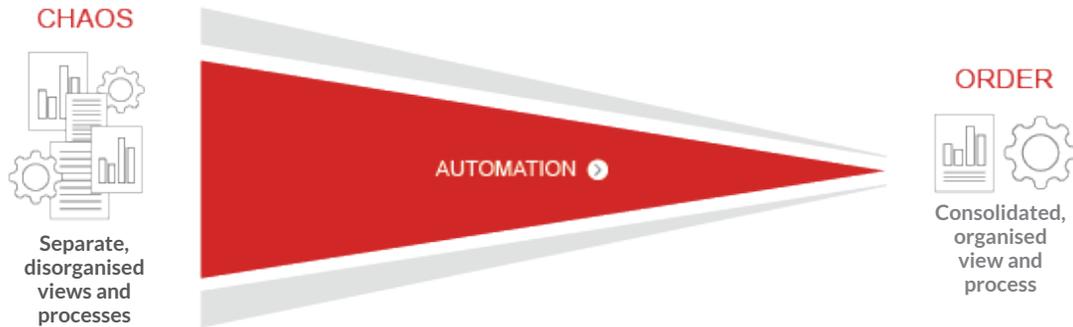

Complete visibility into IT risk and compliance without heavy customization. Rapidly deployable integrated solution, supporting over 30 out-of-the-box integrations and the ability to easily configure additional integrations.

User friendly

Digital Manager 360 is simple to use. Load content and create surveys fast with a flexible, adaptive user interface.

Powerful insights and reporting

Gain a centralised view of risk across the whole IT infrastructure. One click reports and dashboards for key stakeholders and decision makers across the business.

Best practice

A proven tool in the market and highly rated by analysts, Digital Manager 360 follows guidelines set out by regulations and standards and provides a comprehensive library containing over 1,000 legal standard frameworks, 100,000 sets of controls and requirements and over 50,000 mappings.

Flexible and secure architecture

Delivered as either a SaaS or on-premise solution, this high performing product will help meet the growth of your company's requirements.

Scale your IT GRC activities over time to include vendor, business continuity and enterprise risk management.

DIGITAL MANAGER 360 OVERVIEW

SAI Global's Digital Manager 360 automates the entire IT GRC management process to measure, manage, and sustain risk and regulations enterprise-wide. Digital Manager 360 provides a flexible, out-of-the-box

software platform that can be configured to and integrated with existing environments, technologies, and processes for immediate benefits and return on investment.

As a result organisations can achieve a more consistent and efficient compliance and risk management life-cycle and work towards building improved corporate governance and stronger security posture.

Digital Manager 360 can be deployed in the cloud or on-premise. The product offers a plethora of core functionalities and features in our base module. Additional modules and add-ons enable your specific needs as you scale your IT GRC programme.

Digital Manager 360 is well rated for customer satisfaction and by leading market analysts.

The software consistently wins five stars from SC Magazine labs, has won the SC Magazine Innovator-of-the-Year award, and received the GRC Value Award from GRC 20/20.
