SAIGOL *Insights*

HOW DOES SAIGOL *Insights* HELP BUSINESS?

- Maximize data – drive greater usage of audit data across the company with compelling, easy to understand, insightful dashboards.
- Enable fast, informed decision-making with insights that are meaningful and actionable.
- Easy to use interface – specifically designed for viewing over the internet.
- Benchmark sites, distribution centres or suppliers, either locally or globally, against each other.
- Drill down to an audit question or section and compare locations, hierarchical groups or regions.
- Make decisions based on trends and systematic risk patterns, to effectively allocate limited resources.

WHAT ARE THE BENEFITS?

SAIGOL *Insights* helps organizations make better decisions through:

- Intuitive, self-service access to purpose built dashboards, with options to customize to your needs.
- Ability to share insights with senior management.
- Reliable business data for more informed decision-making.
- Leverage a business intelligence tool without the time and cost of implementing a bespoke solution.
- Easily aggregate and interrogate audit information for meaningful insights.
- Opportunity to enrich audit information with other business data to identify risk.

TOOLS AND DASHBOARDS

SAIGOL *Insights* provides a suite of tools and dashboards designed to enable companies to get additional value from their audit data and make informed decisions around risk and compliance. Powered by one of the world's leading business intelligence tools, organizations who engage SAI Global for audit services will now have the option of accessing a purpose built, customizable platform to interrogate their audit data and uncover valuable insights.
